Dear DOE/DTSC,

Please consider these ACME comments on the Phase 3 Chemical Sampling of the Subarea 5A within AREA IV of the Santa Susana Field Laboratory.

There needs to be sampling on the entrance road to the Radioactive Materials Handling Facility (RMHF) as there was open-air storage along this road (Above Photo) and it could have impacted the soils/groundwater below the surface of the asphalt.

The Community looks forward to Ensure a Proper Cleanup of the Santa Susana Field Laboratory, it's Related Facilities and their Surrounding Communities.
