ACME (Aerospace Cancer Museum of Education) is writing you to express concerns related to the Draining and Maintenance of the Woolsey Canyon Water Tower. The LVMWD provides water to our Museum located at 23350 Lake Manor Drive about 1.2 miles below the above said Water Tower. Has this Tower provided water to our location in the past? Where is our water currently coming from? ACME was witness to recent water testing in the area, what type of Maintenance and sampling is going on? We are concerned about the findings of offsite contamination from the Santa Susana Field Lab. We look forward to hearing from you.

William Preston Bowling - Founder ACME (Aerospace Cancer Museum of Education)
