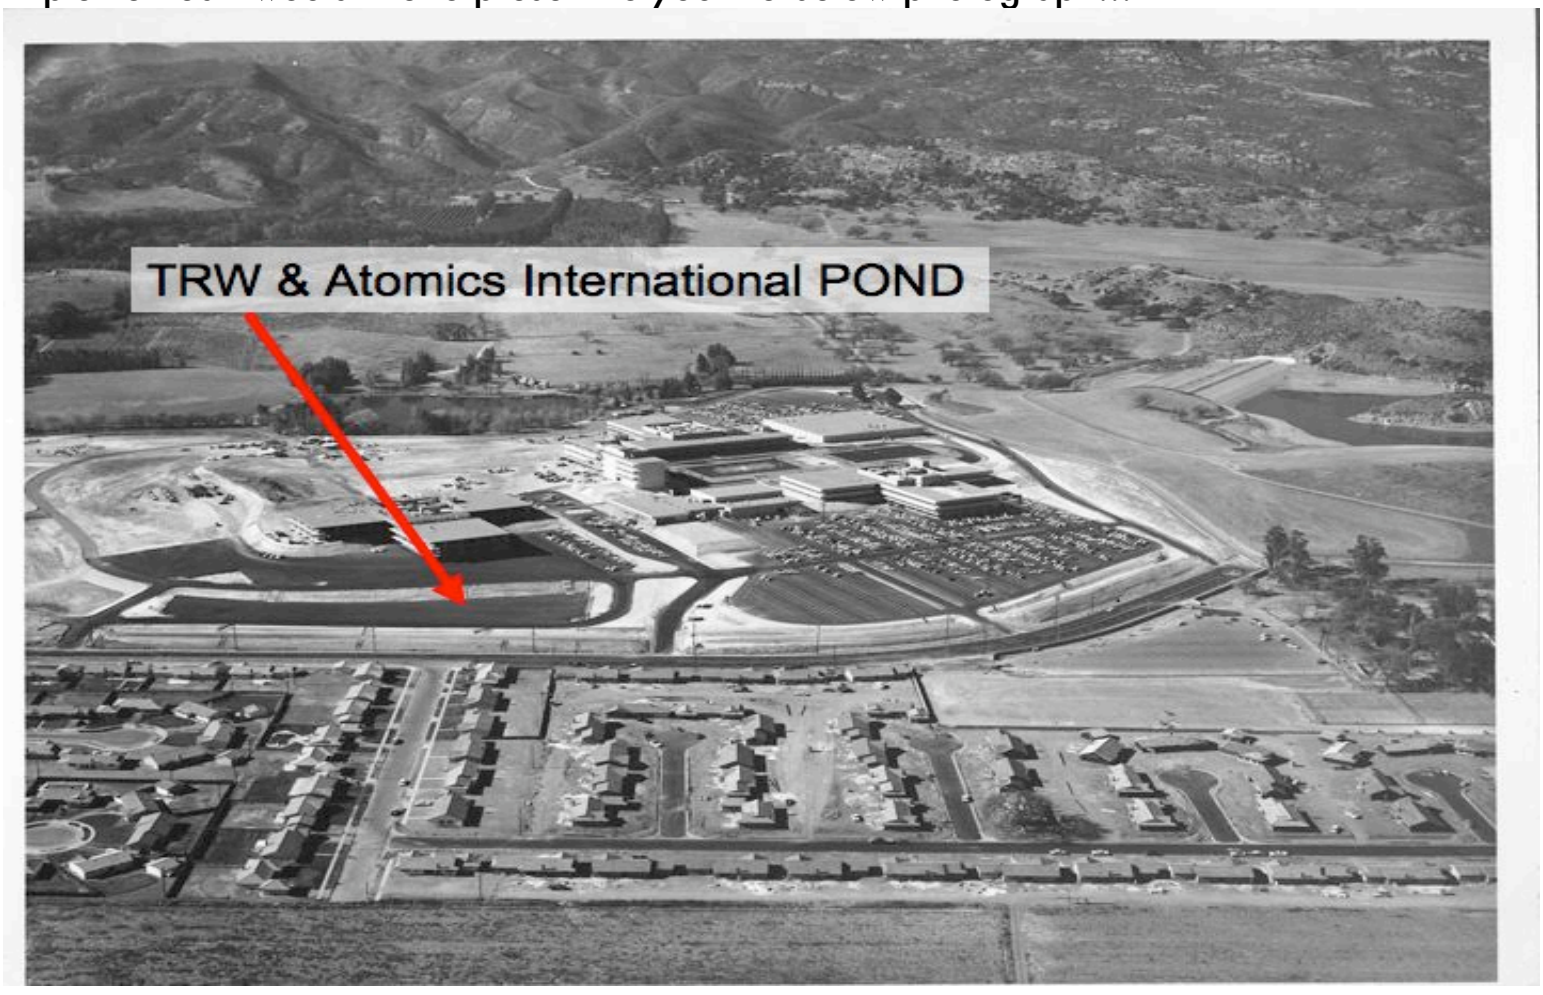
A.K.A. Atomics International, Hughes Missile Systems, TRW, Bunker Ramo, De Vry and Raytheon

Dear Mr. Glick,

In further efforts to fully understand the past operations of the above referenced site in order to remedy the Areas of Concern (AOC) before any approvals or revisions to the Zone, General Plan, Site Plan Review, CUP or any potential to disturb soil or groundwater is Implemented I would like to present to you the below photograph…



With all the information we have gathered about records being destroyed because of Radiological Contamination we must assume that pond at Fallbrook and Roscoe Facilities was used for Nuclear Research and before any approvals or revisions to the Zone, General Plan, Site Plan Review, CUP or any potential to disturb soil or groundwater a full Environmental Impact Report should be assigned to this project.

Also see attached letter from Phil Chandler who worked on this project for the DTSC. This letter was written as Phil Chandler a Private Citizen to Maureen Gorsen, Director of DTSC, asking for an explanation of "why there is no executed mechanism for corrective action" on the Corporate Pointe Campus.

We do not want to risk the health of these neighbors anymore.

Thank you in advance for all your work on these issues and keeping us informed on associated correspondence and request you continue to do so.

Take care,

William Preston Bowling - Founder/Director
