

Department of Toxic Substances Control (DTSC)
Debbie Raphael, Rick Brausch, Mark Malinowski & Yvette LaDuke

7/12/2012

Dear DTSC,

On Friday June 29th, 2012, the Department of Toxic Substances Control sent out the Santa Susana Field Laboratory Monthly Status Report that covers activities completed in the 30 prior under the section listed as Public Participation you have listed...

Notification for planned demolition of Building 4015 (Above photo with Stray Cow from Runkle Canyon) in AREA IV was submitted on June 13 for DTSC review. Subsequent notification was sent to the community. When was this notification sent to the community and how was it sent? I was never notified.

What happened to DTSC offering the public a comment period in any of this? The Boeing Co. just recently demolished the Components Test Lab V and most recently Components Test Lab III without any public comment period as seen in their latest newsletter...

http://www.acmela.org/images/Boeing_Santa_Susana_Newsletter_June_of_2012.pdf

Since Building 4015 is located in AREA IV has the Environmental Protection Agency who is overseeing the Radiological Characterization and Historical Site Assessment been notified and what have they recommended?

Please respond in a timely matter as I am still waiting for a response from my June 26th letter (http://www.acmela.org/images/ACME_to_DTSC_Runkle_Canyon_June_26_of_2012.pdf) and would like the chemical results of OS-21 from Runkle Canyon LLC that you have on file that was completed recently and request the DTSC split-sample results to be included. DTSC should have been there at the meeting as a representative of the community to answer the City of Simi Valley and hope to see state representation at the July 16, 2012 6:30pm City of Simi Valley City Council Meeting regarding this same issue.

The Community looks forward to a continuing relationship with DTSC to Ensure a Proper Cleanup of the Santa Susana Field Laboratory, it's Related Facilities and their Surrounding Communities.
