DOE Awards Contract for Environmental Remediation Services at California Santa Susana Field Laboratory

Cincinnati – The Department of Energy (DOE) today awarded a task order (contract) to CDM, A Joint Venture, of Fairfax, Virginia, to provide environmental remediation services for the Energy Technology Engineering Center at the Santa Susana Field Laboratory, Canoga Park, California. The cost-plus incentive fee task order has a 36-month performance period and a value of \$11.3 million.

CDM will continue to assist DOE in chemical sampling, the preparation of a chemical data gap analysis and preparing a soils remediation action implementation plan for Area IV and the Northern Buffer Zone of the Santa Susana Field Laboratory.

The Energy Technology Engineering Center's Area IV was used by the Atomic Energy Agency, a predecessor agency to DOE, for research into nuclear-powered space vehicles and sodium coolant mediums from the 1950s to 1988. The DOE Office of Environmental Management is working to clean up the ETEC site.
