NOTIFICATION OF ACCEPTANCE OF FORM 200 AS COMPLETE, REPORT OF WASTE DISCHARGE, INJECTION OF CARBON SOURCE/ELECTRON DONOR AND REDUCING AGENT, RAYTHEON COMPANY (FORMER HUGHES MISSILE SYSTEMS COMPANY), 8433 FALLBROOK AVENUE, CANOGA PARK, CALIFORNIA 91304 (SCP NO. 0693, SITE ID NO. 2043T00)

Dear Mr. Samorano:

Los Angeles Regional Water Quality Control Board (Regional Board) staff have reviewed the Form 200, Report of Waste Discharge, for the injection of a carbon source/electron donor into groundwater as a part of on-going enhanced in situ bioremediation to reduce volatile organic compounds and the injection of a reducing agent, calcium polysulfide, into the saturated zone for hexavalent chromium reduction at the referenced site. The form, signed June 10, 2009, was received by the Regional Board on June 11, 2009. The *Corrective Action Plan Addendum #3 Work Plan for Additional Enhanced In Situ Bioremediation and In Situ Chemical Reduction Activities*, dated September 2008, was conditionally approved by the Regional Board on February 23, 2009.

This letter constitutes the Regional Board's acceptance of the Form 200 as complete. The proposed injection activities shall not occur at the site prior to the receipt of General Waste discharge Requirement Order No. R4-2007-0019 and the associated site-specific monitoring and reporting program from the Regional Board.

If you have any questions, please contact me at (213) 620-6070 or nchang@waterboards.ca.gov

Sincerely,

Ann Chang, Ph.D.
Water Resource Control Engineer
Site Cleanup Unit I
